

Flygt 3000/1300 Series

LATE STAGE CONFIGURATION PROGRAM

We have developed the late stage configuration program to help reduce lead-times. The 1300 Series program includes select configurations of the 1315, 1320, and 1325 model pumps all FM approved. The 3000 Series program includes select configurations of both standard and FM approved models of 3085, 3102, 3127, and 3153.

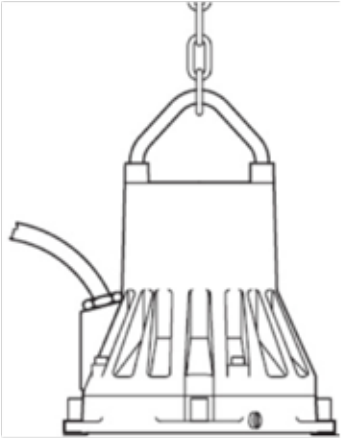

Our Pewaukee facility is stocking motor drive units and hydraulic ends that can be assembled on demand from the field in a few days. The program is designed to be used as an extension of our Shenyang China and Emmaboda, Sweden factories and provide better utilization of inventory while speeding up delivery time to the market.

Models included in LSC Program

Flygt 3000 Series	
All below pumps are 230/460 volt/3 phase	
NP & CP	3085.183
NP	3102.095
NP	3127.095
NP	3127.185
NP & NT	3153.095
NP, NT, & NS	3153.185

Below models are available 230 volt/1 phase	
NP3085.183 -466	
NP3102.095 -464, 465	

Flygt 1300 Series	
All pumps are FM approved to Class 1 Division 1 230/460 volt/3 phase	
KX1315	
KX1320	
KX1325	
FM Class 1 Division 1 approved 230 volt/1 phase	
KX1315-S74
